SUBJECT: Department of Defense (DoD) Comprehensive Small Business Subcontracting Plan Test Program

The attached listing identifies all firms participating in the FY 2003 DoD Comprehensive Small Business Subcontracting Plan Test Program (Comp Plan Test Program). This program was established by Section 822 of Public Law 105-85 and implemented in FY1991 to determine whether the negotiation and administration of comprehensive small business subcontracting plans on a corporate, division, or plant-wide basis would increase subcontracting opportunities for small business concerns while reducing administrative burdens on contractors. Under the Comp Plan Test Program, eligible contractors (selected by the Military Departments) establish annual comprehensive small business subcontracting plans that cover their entire business operation in support of all DoD contracts and subcontracts. Currently, the Defense Contract Management Agency (DCMA) negotiates and administers these plans on behalf of the Military Departments. Participating firms are exempt from negotiating individual DoD contract-by-contract subcontracting plans.

Honeywell, Inc., Sensor & Guidance Products, Clearwater, Florida, recently elected to voluntarily terminate its participation in the program. Accordingly, individual DoD contracting officers shall negotiate and establish a small business subcontracting plan with Honeywell Inc., Sensor & Guidance Products prior to award of all new contract actions that meet the requirements for a subcontracting plan in accordance with FAR 19.702. The designated DCMA contracting officer for Honeywell, Inc., Sensor & Guidance Products shall prepare and submit a report by September 30, 2003. The report on Honeywell's performance should detail the results of the Comp Plan Test Program and comply with reporting requirements at (V)(C)(9) of Test Program Procedures ([www.acq.osd.mil/sadbu/cstp](http://www.acq.osd.mil/sadbu/cstp)).

The DoD Comprehensive Plan Working Council was established to develop and implement Comp Plan Test Program enhancements, and further the objective of increasing DoD subcontracting opportunities for small business firms. The point of contact for this effort is Ms. Barbara Little, (703) 428-0787, [bjlittle@hq.dema.mil](mailto:bjlittle@hq.dema.mil).
